

Important Safety Protocols

- **CPR**
All staff here in August 2022 are up to date with CPR training.
- **AED**
An automated external defibrillator (AED) is a lightweight, portable device that delivers an electric shock through the chest to the heart. The shock can potentially stop an irregular heartbeat (arrhythmia) and allow a normal rhythm to resume following sudden cardiac arrest (SCA).
All staff here in August 2022 received AED training and certification.
- **Bleeding Stations**
We have two trauma kits located in the bleeding stations that have first aid supplies, including tourniquets to assist with severe bleeding.
All staff here in August 2022 received training on first aid and bleed control.
- **Satori Alternatives to Managing Aggression (SAMA) information**
SAMA (Satori Alternatives for Managing Aggression) meets all critical attributes as defined in TBSI (Texas Behavior Support Initiative) for verbal and physical de-escalation. SAMA teaches the least restrictive, safe ways to help manage a student in crisis until the student can regain control. It is part of the SAMA philosophy that it is easier to prevent the behavior from occurring by using positive, proactive interventions.
We have a SAMA trainer, and SAMA trained staff on campus.
- **Addressing Child Abuse, Neglect, and Trafficking**
Our staff received training in August 2022 and in previous years on child abuse, neglect, and trafficking awareness and what actions to take.
